## SUMMARY

Software Quality Assurance Engineer with 1 yr 10 mos of experience in Software Testing and 1 year of experience in Web Development. Experienced in Automation Testing (Katalon Studio) and Manual testing. As a Quality Assurance Engineer, I am skilled in functional testing, Downstream testing, Regression testing, and Automation testing. Extensive experience in SDLC and Agile Methodology. Seeking a technically challenging position in Software Testing.

## PROFESSIONAL EXPERIENCE

### Cognizant Technology and Solutions, India

October 2021 – July 2023 | Kolkata, India

- As a Quality Assurance Engineer, I worked for Great American Insurance Group (GAIG) where I was responsible for ensuring quality and ensuring there should be zero Defect Leakage.
- Creating and documenting test plans, test scenarios, test cases, and test scripts.
- Developing and running test automation scripts in a web services development environment.
- Experienced in Test automation, execution, Defect reporting, and resolution.
- Integration with Jenkins.
- Experienced in SDLC, STLC, and Insurance domains.
- Involved in Downstream Testing using SQL developer to ensure the data was being flown downstream..
- In-sprint Testing: Demonstrated experience in analyzing requirements from user stories and conducting effective in-sprint testing to ensure software aligns with user needs and is defect-free.
- Collaboration with Development Teams: Collaborated with the development team and product owner throughout all phases of development, including performing in-sprint testing and providing valuable feedback for improvements.
- Proficiently managed the defect lifecycle via Rally, skillful capturing, tracking, and prioritizing bugs to ensure timely resolution; additionally, identified and addressed over 60 defects spanning multiple Business units.
- Test Data Preparation and Execution: Proven experience in preparing test data for test cases and executing them.
- Utilized Agile methodologies, collaborated with teams, and Attended Scrum, Sprint planning, and Daily Stand-ups.

### Brahm Technology Pvt. Ltd, India

December 2020 – October 2021 | Jharkhand, India

- As a Web Developer, I worked for Brahm Technology Pvt. Ltd. where I was responsible for Web Development, and Web hosting. Worked with senior developers on critical projects and delivered the given task under ECD.
- Experienced in web development using HTML, CSS, JS, Bootstrap, and in backend PHP and MySQL.
